

Field Name	Data Type	Definition	Units/Format
circuit	String	Identifier for the circuit under test	Alphanumeric String
wire_count	Integer	Number of interconnecting wires	Count
gate_count	Integer	Number of logic gates	Count
fault_type	String	Classification of tested faults	Text (such as "Gate Removal")
fault_count	Integer	Number of injected faults	Count
total_vectors	Integer	Number of vectors in the exhaustive test set	Count
selected_vectors	Integer	Number of vectors chosen by the algorithm	Count
detected_faults	Integer	Number of unique faults detected by chosen vectors	Count
coverage	Float	Proportion of total faults that were successfully detected	Percentage (%)
reduction	Float	Decrease in test vectors compared to full set	Percentage (%)
runtime	Float	Execution time of the selection algorithm	Milliseconds (ms)
